ORC 2023

The 3rd Odisha Research Conclave (ORC) took place from November 14th to 16th, 2023, through a collaborative initiative between the Odisha State Higher Education Council (OSHEC) and Sambalpur University. The central aim of this academic event was to foster inspiration and active participation among students in research endeavors, encouraging them to showcase their burgeoning research skills.

By bringing together a diverse array of students and scholars, the ORC aimed to create a platform where the exchange of ideas and the demonstration of innovative research could flourish. The event played a pivotal role in promoting a culture of research and inquiry, emphasizing the importance of academic exploration and contributing to the advancement of knowledge within the academic community.

DIVERSITY AND ECOLOGY OF MOTHS OF CHANDAKA- DAMAPARA WILDLIFE SANCTUARY, ODISHA, INDIA

Student's Corner

Lepidoptera is one of the prominent insect group which includes both Moths and Butterflies.

Being the diurnal member Butterflies received maximum attention and that's why one of the most studied groups. Although moths are quite more diverse than butterflies in all aspects but being a cryptic and nocturnal member have not received enough recognition in comparison to butterflies. As the title of my research my study includes the study of diversity of moths in the Chandaka- Damapara area, in brief I can say the study is the different types of moth species available in this area. Since after the britishers there were no significant study was carried out in the state and study will necessarily help to know the diversity of this group.

As moths played a role vital role in maintaining ecological balance the study is currently providing new insights about ecological dynamics and interactions with other organisms.
